

No-cost arthropod vector research products

Research infrastructures for control of vector-borne diseases

Open for orders 2017-2021

Vectors

- Mosquitoes
- Culicoides
- Sandflies
- Tsetse flies
- Ticks

Infected Vectors

- Mosquitoes – malaria
- Mosquitoes – arboviruses
- Sandflies - leishmania

Genomics & Bioinformatics

- Illumina DNA sequencing
- Illumina RNAseq
- Metagenomics
- Small RNA sequencing
- Long-read sequencing

Technology Platforms

- High throughput live mosquito screen
- Mosquito cell line
- siRNA screening
- Insecticide study tools

VECTOR BIOLOGY
PRODUCTS, SERVICES
AND FACILITY ACCESS

Training

- Secure insectary methods
- Vector genomics & bioinformatics
- Personalized Training

Transgenic Vectors

- Aedes
- Anopheles
- PiggyBac and CRISPR/Cas9

Facility Access

- Mosquito behavior
- Vector infection studies
- Electrophysiology

Order no-cost products from <https://infravec2.eu>

Simple request form on our website. No-cost vector products available to researchers worldwide.

Coordination & Funding:

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement N°731060.
