

# Sustaining the [Malaria] Gains: a MasterClass with Profs. Thomas Churcher & Ellie Sherrard Smith

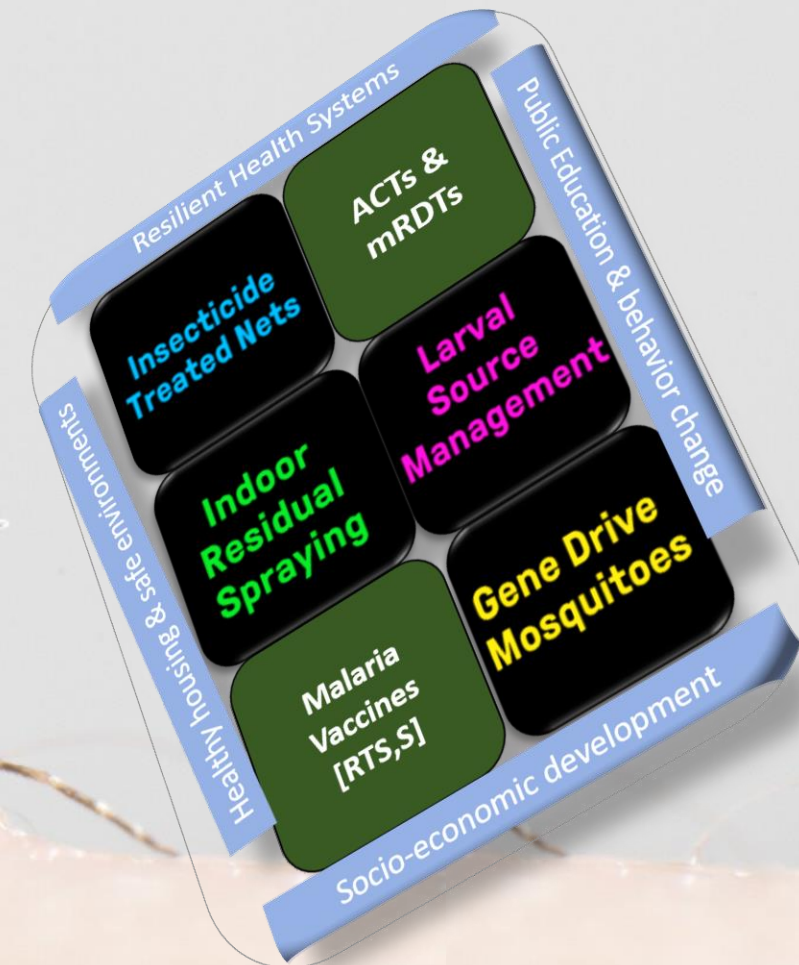

Ifakara MasterClasses in Public Health & Medical Entomology  
Episode XXXI: Thursday, October 14th 2021; Starting 2.00 pm EAT

Hosted by Fredros Okumu (Ifakara) & Sheila Ogoma (CHAI)

## Key Topics:

1. Magic Mixes: selecting the best combinations of interventions in different contexts
2. Evidence-based vector control: what next for ITNs, IRS & LSM
3. Anticipating the RTS,S vaccine roll-out: how do we use it alongside other tools?
4. Transformative approaches & tools: [a case for improved vector control options]
5. Measuring impact of malaria interventions: balancing ento and epi indicators
6. Measuring the gaps in vector control: a case of mosquitoes biting outdoors and early
7. Impact of insecticide resistance on vector control – how best should we respond
8. Sustaining the malaria control gains: how do we prevent stagnation and rebounds?
9. Careers & mentorship: personal experiences in public health and academia
